f) DEALS

We help our clients do better deals and create value through synergized strategies, merger, acquisitions, disposals, loan financing, investment negotiation and business restructuring. We work together with our clients to help develop the right strategy before the deal, execute their deals seamlessly, identify issues and points of negotiation and value, and implement changes to deliver synergies and continuous improvement after the deal.

Our Approach

We work with our Clients as partners. Together we develop clear, practical action plans, and support or run the implementation of those plans to ensure real and sustainable performance improvement. We have worked with leading corporate organizations including financial services companies in many strategic and operational areas, such as:

Customer orientation to drive organic growth.

We have worked with banks and insurance companies locally and internationally to strengthen their customer focus in all their operations. We have redesigned processes at all customer touch points with the organization and installed feedback loops to ensure the voice of the customer is heard and acted on. G. I & Co. developed a tool that focuses companies on developing levels of customer loyalty that lead to growth—and pioneered its application in the financial services industry.

Understanding and fulfilling your needs

Expect a teaming approach in which we work with you to understand your management and stakeholders needs and to customize service delivery to those needs. This shall reflect in our consultancy approach and strategy.

Client needs Assessment

Through interactive personal surveys, our Client needs assessment process gives your people the opportunity to define their needs and clearly articulate what benefits they desire from the services we provide. We shall also discuss the degree of satisfaction with our service delivery and any areas of concern (i.e. changes in people, processes and technology). Client needs assessment establishes the base for high levels of satisfaction throughout the relationship.

Business process analysis

Business process analysis is conducted to establish appropriate parameters for gauging our client's strategy and business needs. Understanding our clients business is important in obtaining a preliminary understanding of the principal features of your management system and internal control procedures; determining the appropriateness of the management system in place and to what level they do suit the company's business processes. Our consultancy approach is only determined after a careful understanding of the business, and risk of material misstatements.

Reducing costs and complexity to improve performance.

Organizations that consistently marry greater efficiency with higher productivity in serving customers generate the highest shareholder returns. We work with leading service providing firms to strip complexity out of products and processes, and reduce costs as a way of bolstering or rebuilding margins.

Harnessing and sourcing information technology

Today's Organizations must have a technology strategy that's both sophisticated and efficient if they are to compete successfully. We help our Clients decide how best to source technology and ensure that information technology is aligned with business growth objectives and delivers effectively on its promise.

Integrating acquired companies to realize the most value.

Successful merger integration lies in a few, powerful guiding principles: Tailor the integration thesis to the deal thesis; integrate where it matters; and act with deliberate speed. We have worked with Organizations around the world to integrate acquisitions quickly and accelerate the delivery of expected value. Increasingly, we support clients that absorb acquisitions in the developing growth markets at all level.

Making and Executing key decisions better and faster to fuel unprecedented financial performance.

Organizations' ability to react nimbly to mounting industry pressures—changing regulatory demands, diversifying product lines and markets, and increasing industry risk and uncertainty—depends on how effectively they make critical decisions. We work with our Clients to identify the highest value decision opportunities, establish clarity about decision accountabilities, and build enduring behaviors, measures and incentives throughout the organization to continuously produce faster, better decisions, faster action, and improved efficiency.

1.0 Technical Proposal & Experience

Preliminary fieldwork

Our goal in preliminary fieldwork is to gain a thorough understanding of your internal controls, processes and procedures. Our goal is to accomplish as much interim fieldwork as possible so that our stay during fieldwork is kept to a minimum. Our preliminary work focuses on planning and internal control documentations.

Planning

We envision the following process during preliminary fieldwork:

1. Establish understanding of services to be performed.
2. Complete our client continuance procedures and address any independence issues.
3. Document our understanding of your entity and compile risks identified.
4. Document significant processes and activities.
5. Perform required fraud “brainstorming” with audit team.
6. Assess risk of material misstatement arising from errors or fraud at entity level.
7. Agree on timing and deliverables thru an entrance meeting.
8. Develop overall audit strategy.

Internal control documentations

Our internal control documentation usually occurs prior to our arrival for fieldwork. Our documentation process will be as follows:

1. Gather or update documentation for significant processes defined in our preliminary fieldwork.
2. Perform a “walk-through” of these significant processes.
3. Ask “what can go wrong” questions.
4. Identify controls in place. This will include both preventative and detective controls.
5. Evaluate the design of internal controls.
6. Decide whether to test and rely on controls.

1.1 Deliverables

At the end of an audit assignment, we shall produce the following:

- A management letter, on which we highlight all internal control weaknesses identified by us in the course of the assignment. This is an internal document meant to aid management in assessing the integrity of internal controls in place with necessary corrective recommendations for management's implementation.
- An audit report prepared in line with the best practice and which complies with the requirements of Companies and Allied Matters Act on Audits reports.

1.2 Ethical Requirements

In line with the global ethical requirement on change of professional engagement, we are required by the Institute of Chartered Accountants of Nigeria to communicate your outgoing auditor (if any), of our current move to act as your auditors. We shall therefore seek your consent to do this.

2.0 Work Plan & Scope

The proposed scope of work involves the performance of specific tasks. Our professional approach is applied consistently around our locations, while providing the flexibility to serve the unique circumstances and complexities of our Clients. Our approach focuses on understanding the Clients' global business and control issues from the inside out.

We understand that, to achieve your potential, you need a tailored services as much as consistent methodology, we work to give you the benefit of our deep knowledge of the subject matter of this proposal and the latest insight from our extensive work pedigree.

Below are major tasks which explain our approach to the assignment:
